III. DETAILED ACTION

Claims Presented

1. 1-34 are presented.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laurence et al. (US 4860352, cited by Applicant, hereinafter also referred as "Laurence") and Schipper et al. (US 574657, cited by Applicant, hereinafter also referred as "Schipper").
- 4. Regarding claim 1, Laurence teaches a method comprising, in connection with authenticating a client of a network, acquiring information that characterizes the client in a manner that enables a determination about authenticating the client of the

Application/Control Number: 09/560,784 Page 3

Art Unit: 2134

network, ... and making an authentication decision based on the information (column 6, line 53 to column 7, line 32, i.e. position encryption which provides authenticating in a satellite network -- "the satellite and receivers" teaching "server and clients").

- 5. These passages of Laurence do not teach "the information being acquired other than in the form of a digital message that is passed on behalf of the client to the network aliases."
- 6. Schipper teaches "the information being acquired other than in the form of a digital message that is passed on behalf of the client to the network (column 6, lines 29-45, i.e. putative source handling)" for the motivation of "authenticating source of a message" (column 6, lines 14-18).
- 7. It would have been obvious to those of ordinary skill in the art at the time of the claimed invention to combine the teachings of Laurence with the teachings of Schipper for the motivation noted in the previous paragraphs so as to teach the claimed invention.
- 8. Regarding claims 2-34, such various network and satellite and security handlings are well known in the art for the motivation of safe communication. Such details are referred

Application/Control Number: 09/560,784

Art Unit: 2134

throughout Laurence and Schipper, such as at the cited passages of Laurence and Schipper.

Conclusion

Points of Contact

9. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 746-7239, (for formal communications intended for entry)

Or:

(703) 746-5606 (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Application/Control Number: 09/560,784 Page 5

Art Unit: 2134

Hand-delivered responses should be brought to Crystal Park II,
2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Jung whose telephone number is (703) 308-5262 or Greg Morse whose telephone number is (703) 305-4789.
